# Agenda

- Update on ICA 2018
- VICA 2018 – ICA going virtual
- **Next step: International Actuarial Platform**

# International Actuarial Platform (IAP)

- Actuarial knowledge is provided in many ways (documents / videos / congresses / ...) by a large number of actuarial associations and similar institutions worldwide
- In general, knowledge is stored locally (e.g. access only via institution's homepage) or is not provided permanently (e.g. conference contributions)
- So far, there is no established platform that enables actuaries to search these databases or that archives "volatile" content permanently
- The ICA 2018 gives the opportunity to structure this knowledge, make it available to a wider audience and raise the awareness of actuaries worldwide

# International Actuarial Platform | Vision

- Building a knowledge database for ICA and colloquia content only does not create enough traffic for a successful platform
- Joint platform for all actuarial activities necessary:

- **Developing a comprehensive concept for all relevant activities**
- **Bringing together all stakeholder interested in actuarial knowledge services, eLearning or up-to-date congress support for national and international target groups**
- **DAV is willing to take a leading role in this project!**

# Intern. Act. Platform | Features

Establishing an online platform for

- **Actuarial Knowledge:** Making actuarial content from associations, sections and other institutions available
- **Online Collaboration:** Working together in restricted virtual workspaces
- **Networking:** Connecting individual actuaries worldwide
- **Online Education:** Creating an infrastructure for online CPD and education courses, especially for associations in less developed countries
- **Virtual Congresses:** Enabling IAA, sections and smaller actuarial associations to host virtual events
  - **Living concept to be developed in the next years!**

**Thank you for  
your attention and  
see you at the  
ICA 2018 in  
Berlin!**
