Exam education development of AICT

1974

- AICT started holding life actuarial exams since 1974.

1993

- AICT started holding non-life actuarial exams since 1993

1994

- AICT started providing pension actuarial exams since 1994

1998

- The whole actuarial exams system was completed in 1998.

2008

- However, AICT has changed its qualification for its fellowship and associateship since 2008 and has stopped holding actuarial exams since then except for the Nation-specific exams including
 - (a) AICT Exam 6GA3 on Actuarial Standard of Practice and Accounting
 - (b) AICT Exam 6GB3 on Insurance Regulations and Discipline
- Currently, the AICT adopts the requirements based on the exams held by Society of Actuaries (SOA) and Casualty Actuarial Society (CAS) for qualifications of its fellow and associate member
- Besides, the AICT holds activities and professional courses for the continuing professional education.

Exam education development of AICT

2010

- Candidate who passed 6GA3 and 6GB3 could get the Exam 6T credit of CAS (including Exam 6 and online Course 1)

2012.5

- Has passed the 1st phase of CERA treaty status and is applying for the 2nd phase of CERA award status.

2013.7

- Associates of AICT are FQA (full qualified actuary) of IAA.

Continuing Education

- Since 2002, AICT has held Professional Ethics course annually and developed more topics on continuing education.
- In 2010, the required credits of continuing education **for appointed actuary** increase from 15 credits to 30 credits in order to keep pace with the changing and developing knowledge and actuarial practices.
- For example, in 2010, AICT provides more than 50 credits seminars on continuing education in non-life insurance.

A brief summary of the AICT Continuing Professional Education (CPE) requirement:

- Every fellow that provides Appointed Actuary Services must complete 30 credits of professional development every year or 60 credits for 2 years in a row.
- Among the requisite 30/60 credits,
 - members must earn at least 50 percent of their credits in *organized activities* such as attending actuarial conferences held by international or local organizations.
 - The rest part can be earned from *other activities* (and must be counted less than 6 hours each) such as attending conferences held by the AICT committee
 - At most 8 credits per year of the activities on the topic of Principle of Actuarial Practice or Professional Ethics can be counted

Challenges

- Appointed Actuary (AA) system was launched at year 2003.
- Non-life Pricing Deregulation was launched at year 2009.
- IFRS4 phase 1 was launched at year 2011.
- However, CAS-certificated fellows and associates in Taiwan doesn't increase as the rate of demand so there is a talent gap problem in Taiwan.
-
- Demands for qualified non-life actuaries are increasing year by year, especially from non-life Insurance Industry and regulation in Taiwan.
- The skilled and experienced actuaries would Never be enough.

Current Event

2014EAAC(12-15, October, 2014)

- 2014EAAC will be held in Taiwan with the theme “Risk, Challenges and opportunities“
- Compared to last time’s event (1989) in Taipei Taiwan, there were about 200 attendants. However, we expect 500-700 people will attend this event.
- In 2014EAAC, there will be 18 concurrent sessions with various subjects including “life insurance”, “general insurance”, “health insurance”, “pension and social security” and “risk management” and we need about 36 papers in presentation. .

Welcome to Formosa Taiwan.

Thanks for your attention!
