SECTION NEWSLETTERS

A special interest section is a group of Society members organized to study and discuss their common function and professional interests and to contribute information to the actuarial profession. Sections are successful because their members get involved. They are structured but flexible so as to be responsive both to the needs of the profession and to the specific needs of
their members. Society members can discuss their special interests at the section level with other members and still be served professionally through the Society structure.

Sections publish newsletters and special reports, plan Society meetings and seminars, hold breakfasts and luncheons with guest speakers at Society meetings and support actuarial research efforts. Section members are eligible to vote in Council elections and to hold office in the section to which they belong.

People in the actuarial profession and related fields in the United States, Canada, and other countries who are not members of the Society of Actuaries have the opportunity to take advantage of these special interest groups. Nonmembers can subscribe to one or more special interest sections in order to receive their mailings and to be invited to participate in seminars and other Section-sponsored programs. It is a good opportunity to keep abreast of actuarial advancements and activities in North America.
