

**Professionalism Committee**  
**International Actuarial Notes (IANs) – Numbering Convention**

**Background:**

The current IANs have numbers 1 through 12 assigned. Several new IANs are being developed and there will be others that follow in the future. The PC discussed a suitable Numbering Convention for future IANs at the meeting in Zurich.

Consequently, the following numbering convention is proposed for adoption:

Group and assign a number series to IANs based on the topic.

E.g.

Numbers 1- 12: current IAN numbers as already assigned.

Number Series 100 – 199: IANs relating to IFRSs

Numbers Series 200-299: IANs relating to ERM et.

*This proposal was adopted by the PC at their meeting in St Petersburg on 26 May 2016*
