If yes, please explain why the particular topic should not be included.

3. What other topics should be included in this ISAP?

Please cover why you wish guidance in this area and if appropriate provide an example to illustrate the issue. Please note that the ISAP is not intended to address unique, country-specific issues. Member associations and local actuarial standard setting organizations could address such issues by providing additional guidance to their members as the ISAP is adopted, or adding such additional guidance within the local adaptation of the ISAP.

Nothing in particular.

4. Please use this space for any additional comments not covered above.

Considering the variety of products/markets of insurances in the world, this ISAP should not be highly descriptive or rule-based.
