Banking Virtual Forum Webinar – Banking Resilience Risk Management

Audience: All

Date: 20 March 2024 / **Time:** 07:00 AM (EST) 13:00 PM (CET)

The conventional approach to risk management involved the estimation of loss distributions from which provisions and capital could be allocated to absorb expected and unexpected losses. But what happens if a tail event occurs and the Bank is faced with recapitalising the Institution? Or with winding down the Institution without impacting the domestic real economy, or drawing on tax-payers funds or propagating stress into the bank sector? The answer to these questions can be found within the Recovery and Resolution Planning regulatory framework.

IAA Members and Actuaries are encouraged to attend this event if they are interested in understanding the:

- Reasons why Recovery & Resolution Planning was introduced into the banking sector regulatory environment
- Building blocks associated with Recovery & Resolution Planning frameworks, leveraging global regulatory standards and real-world experiences
- Requirements relating to Valuation in Resolution (ViR)
- Potential future direction of resilience risk management
- Opportunities for Actuaries seeking a move into the Banking Sector
